

“How To....” Guide for your Flat White Website

Add a Rotator

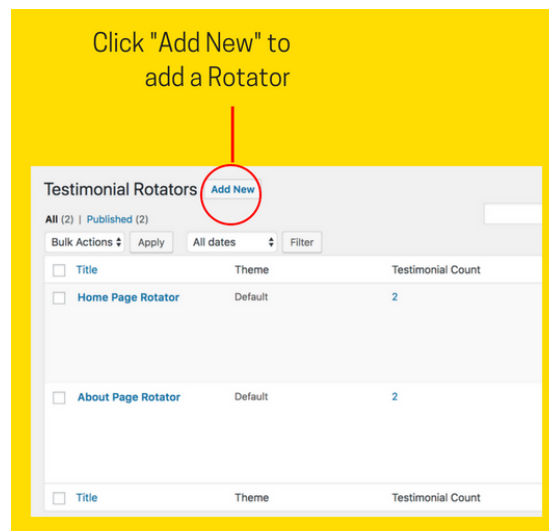

Rotators are the mechanism to display Testimonials. There are two Rotators set up on your Flat White website: one on your Home Page and one on your About Page. Any Testimonials can be displayed in one or both of these places – just select the relevant Rotator (see the separate Video and PDF to explain how to add a Testimonial).

Access the Rotators via the WordPress Dashboard:

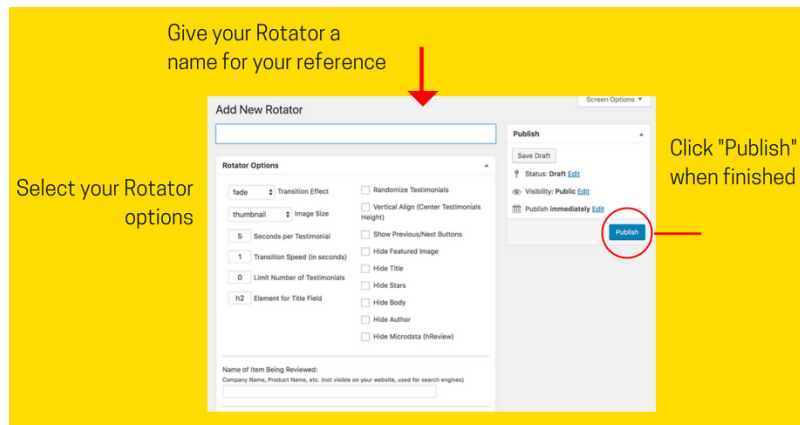

Adding a Rotator

Click on All Rotators, and you will see a list of Rotators on your website. To add your own Rotator, click “Add New”:

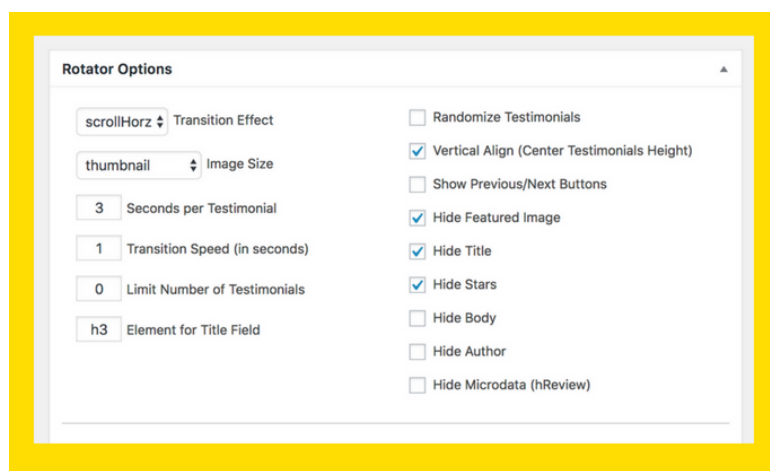

Give your new Rotator a name for future reference – this will not show on your website.

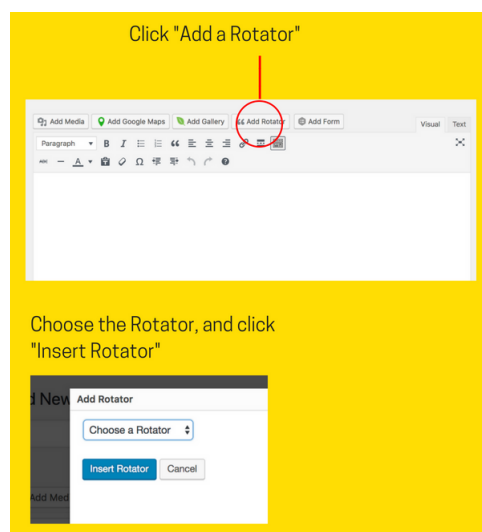

We recommend using the Rotator options that we have selected for the rotators we have set up on your website, although you can change the Transition Effect, and Seconds per Testimonial without affecting the layout.

Adding a Rotator to your Website

You can add a Rotator via the WordPress Text Editor. Click the “Add Rotator” button, then select the Rotator you want to display.

You can also add a Rotator in the Sidebar – see separate Video and PDF for more details.
